Explanation of Non-GAAP Financial Measures

Allscripts reports its financial results in accordance with U.S. generally accepted accounting principles, or GAAP. To supplement this information, Allscripts presents non-GAAP net income on a per share basis and Adjusted EBITDA which are considered non-GAAP financial measures under Section 101 of Regulation G under the Securities Exchange Act of 1934, as amended.

- Adjusted EBITDA is a non-GAAP measure and consists of GAAP net income (loss) as reported and adjusts for: tax provision (benefit); interest expense and other income, net; stock-based compensation expense; depreciation and amortization; deferred revenue and other adjustments; non-recurring and transaction-related costs; and non-cash asset impairment charges.
- Non-GAAP net income on a per share basis consists of GAAP net income/(loss) as reported, and adds back acquisition-related amortization, stock-based compensation expense, non-recurring expenses and transaction-related costs, non-cash charges to interest expense and other, and non-cash asset impairment charges, in each case net of any related tax effects. Non-GAAP net income on a per share basis also includes a tax rate alignment adjustment.

Management believes that non-GAAP net income on a per share basis and Adjusted EBITDA provide useful supplemental information to management and investors regarding the underlying performance of Allscripts business operations. Acquisition accounting adjustments made in accordance with GAAP can make it difficult to make meaningful comparisons of the underlying operations of the business without considering the non-GAAP

adjustments provided and discussed herein. Management also uses this information internally for forecasting and budgeting, as it believes that these measures are indicative of core operating results. In addition, management may use non-GAAP net income and/or Adjusted EBITDA to measure achievement under Allscripts stock and cash incentive compensation plans. Note, however, that non-GAAP net income on a per share basis and Adjusted EBITDA are performance measures only, and they do not provide any measure of cash flow or liquidity. Non-GAAP financial measures are not in accordance with, or an alternative for, measures of financial performance prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with Allscripts results of operations as determined in accordance with GAAP.
