

Heritage Valley Health System expands Allscripts partnership to improve physician satisfaction and drive consumer and population health initiatives

February 4, 2019

Health System extends and further expands portfolio to provide a single integrated record across multiple facilities

CHICAGO, Feb. 04, 2019 (GLOBE NEWSWIRE) -- Allscripts (NASDAQ: MDRX) announced today that Heritage Valley Health System signed a 10-year extension and expansion agreement for the integrated delivery system's physician practices, outpatient facilities and three hospitals -- Heritage Valley Sewickley, Heritage Valley Beaver and its new facility, Ohio Valley Hospital. This expansion will provide a complete integrated clinical and financial platform that includes Allscripts Sunrise™ EHR, Sunrise™ Financial Manager, dbMotion™ Solution, and Allscripts EPSi

Heritage Valley Health System is a \$535 million integrated delivery network providing comprehensive healthcare for residents of Allegheny, Beaver, Butler and Lawrence counties, in Pennsylvania; eastern Ohio; and the panhandle of West Virginia. In partnership with 4,400 employees and more than 530 physicians, Heritage Valley offers a broad range of medical, surgical and diagnostic services at its three hospitals; in 60+ physician offices; and more than 21 community satellite facilities.

Used by hospitals and health systems across the globe, Allscripts Sunrise is a fully integrated electronic health record that connects all clinical and financial aspects of care, including inpatient, emergency, surgery and outpatient care. Built to serve complex care through clinical decision support, Sunrise is a physician-friendly, mobile and evidence-based single platform that includes integrated financial solutions and analytics. Community- and genomically-aware, Sunrise supports all core care venues across the enterprise by delivering a single patient record, and features patient-centric capabilities that increase access and convenience for the consumer.

The dbMotion Solution aggregates data from disparate source systems, harmonizes the information, and delivers it in a usable and actionable format at the point of care, within the provider's native and familiar workflow. EPSi is a complete and flexible single source of truth for patient financial and clinical data – designed specifically to deliver actionable insights that enable hospitals and health system to manage costs, optimize budget and long-range planning, and improve margins.

"This is an incredible opportunity for our organization to use a high-performing EHR to create a single integrated patient record," said Norm Mitry, Chief Executive Office of Heritage Valley Health System. "The power of Allscripts Sunrise combined with the population health and financial decision support of dbMotion and EPSi, will continue to help us meet key meaningful use deadlines and deliver the best quality care for the patients and communities we serve."

"We are pleased that Heritage Valley Health System has renewed and expanded its partnership with Allscripts," said Paul M. Black, Chief Executive Officer of Allscripts. "We are committed to aligning with Heritage Valley Health System's efforts to create an integrated platform and supporting its consumer and population health initiatives."
