

San Gorgonio Memorial Hospital selects Allscripts electronic health record suite for community hospitals

November 14, 2019

CHICAGO--(BUSINESS WIRE)--Nov. 14, 2019-- Allscripts Healthcare Solutions (NASDAQ: MDRX) today announced that San Gorgonio Memorial Hospital selected its electronic health record (EHR) suite Sunrise™ Community Care, which is built specifically for community hospitals.

Sunrise Community Care is an integrated EHR as a service, providing community hospitals a modern, cloud-based EHR to fit the needs of community hospitals that are under 100 beds. This Azure-hosted, single platform EHR is an end-to-end offering with clinical, financial and ambulatory content to help organizations run smoothly and achieve operational and financial success.

San Gorgonio Memorial Hospital offers a variety of high-quality, personalized healthcare services. The hospital serves a very diverse population and provides healthcare for each patient, addressing and answering patients' needs individually as valued members of the community. San Gorgonio Memorial Hospital ensures the local availability of quality, primary, community healthcare.

"We chose Sunrise Community Care due to it being built especially for the unique challenges community hospitals face," said Steve Barron, CEO, San Gorgonio Memorial Hospital. "We believe Allscripts and the power of Sunrise Community Care will provide us with the tools and partnership needed to deliver coordinated care across settings—all while providing the best possible patient care."

The comprehensive EHR as a service includes managed services, software and maintenance, plus regular upgrades in order to keep features and content up to date. Because the EHR is hosted in Microsoft Azure, there is overall improved cost of ownership and shorter implementation times compared to a traditional on-premise implementation. This solution can relieve administrators and clinicians from the burden of configuring an EHR by delivering out-of-the-box, evidenced-based, standardized workflows Allscripts clinicians and usability experts have developed.

"Sunrise Community Care is designed to help meet the unique clinical and financial needs of community hospitals, with a single patient record across the enterprise, enabling their teams to provide safer, more informed patient care," said Nicole Faucher, Allscripts Vice President, Client Development. "This solution will help San Gorgonio Memorial Hospital improve outcomes, increase patient satisfaction and decrease clinician burnout."
