The New York Times

Health Industry Under Pressure to Computerize

By STEVE LORBER

WASHINGTON, Feb. 17 — David J. Healy, the federal official who is trying to speed the nation's health care system into a computer age, has delivered a warning to the health care industry: take steps soon to make it happen or the government will probably impose a solution.

Across the ideological spectrum, health care regulators and politicians agree that the nation's hoards of paper medical files need to move into the digital era, or that eventually someone will force them to do so.

Congress has, with much of the past 12 years, been mired in controversy over technology or technical standards.

The approach, the needs of specialists, and

Allscripts customer Dr. Allison Foley from St. Jude Heritage Medical Group in Fullerton, California was recently featured in a CNN story on e-prescribing. St. Jude Heritage Medical Group is a multi-specialty group practice with 103 physicians in Fullerton, CA with practices in 11 locations. When Viox was pulled immediately access a list of all 1,600 patients on the patient within two hours. They utilize the comp Allscripts and expect to be paperless within a year.

The Washington Post

Clinton, Frist Tout Medical Records Bill

By DEVI IN BARRETT

WASHINGTON — Hillary Rodham Clinton and Bill Frist, two senators in the mix of speculation about the White House race in 2008, touted a new medical records bill Thursday that they said is necessary to prevent life-threatening mistakes.

Clinton, a Democrat who led President Clinton's unsuccessful push for substantial health care overhaul in the early 1990s, said the standard of record-keeping in the United States remains "in the Dark Ages" at a time when people can easily access a wide range of information on the internet.

TIME

The e-Health Revolution

How a bipartisan bill from Hillary Clinton and Bill Frist could help jumpstart a new kind of health-care reform

By BILL SAPORTO

One nation is not great because it has a computer. It is great because it has a computer that is used to help it do things that are hard to do by hand. It is great because it has a computer that is used to help it do things that are hard to do by hand. It is great because it has a computer that is used to help it do things that are hard to do by hand.

Being better equipped to make and receive medical decisions and, most important, making it easy for them to be read and shared by the doctors, scientists and patients who are part of the health care system. There is one generation of electronic technology that is not yet ready to be used in the health care system. It is the generation that is not yet ready to be used in the health care system. It is the generation that is not yet ready to be used in the health care system.
