Financial Commentary

"Allscripts delivered another strong quarter and year of financial performance," said Bill Davis, Chief Financial Officer of Allscripts. "We had the best bookings quarter in the Company's history and saw our non-GAAP revenue and net income grow 15 and 23 percent, respectively, in the fourth quarter. We also continued our long-term commitment to invest in innovation, while demonstrating continued operating leverage.

"The quality of our results were particularly notable given record cash flow from operations and a decline in day sales outstanding (DSO) by six days, yielding a DSO of 84 days. We also continued to repurchase shares and reduce debt."

Update on Share Repurchase Program

On May 5, 2011, Allscripts announced that its Board of Directors approved a stock repurchase program under which the Company may purchase up to \$200 million of its common stock over the next three years.

As of December 31, 2011, the Company repurchased approximately 3 million shares at a weighted average price of \$19.45 per share for a total of approximately \$51 million. Approximately \$149 million remains for the repurchase of Allscripts common stock during the authorized repurchase period.

Any share repurchases may be made through open market transactions, block trades, privately negotiated transactions (including accelerated share repurchase transactions) or other means. Any repurchase activity will depend on factors such as the Company's working capital needs, cash requirements for investments, debt repayment obligations, our stock price, and economic and market conditions. The Allscripts stock repurchase program may be accelerated, suspended, delayed or discontinued at any time.

Explanation of Non-GAAP Financial Measures

Allscripts reports its financial results in accordance with generally accepted accounting principles, or GAAP. To supplement this information, Allscripts presents in this release total non-GAAP revenue, gross profit, operating income and net income, including non-GAAP net income on a per share basis, which are non-GAAP financial measures under Section 101 of Regulation G under the Securities Exchange Act of 1934, as amended. Total non-GAAP revenue consists of GAAP revenue as reported and Eclipsys revenue for periods prior to the August 24, 2010, consummation of the 2010 merger with Eclipsys (2010 Merger) and adds back the acquisition-related deferred revenue adjustment booked for GAAP purposes. Total non-GAAP gross profit consists of GAAP gross profit as reported and Eclipsys gross profit for periods prior to the consummation of the 2010 Merger and adds back the acquisition-related deferred revenue adjustment booked for GAAP purposes. Total non-GAAP operating income consists of GAAP operating income as reported and Eclipsys operating income for periods prior to the consummation of the 2010 Merger and adds back the acquisition-related deferred revenue adjustment booked for GAAP purposes and excludes acquisition-related amortization, stock-based compensation expense and transaction-related expenses. Non-GAAP net income consists of GAAP net income as reported and includes Eclipsys net income for periods prior to the consummation of the 2010 Merger, excludes acquisition-related amortization, stock-based compensation expense and transaction-related expenses, adds back the acquisition-related deferred revenue, in each case net of any related tax effects. Non-GAAP net income also includes a tax rate alignment adjustment.

Acquisition-Related Deferred Revenue. Acquisition-related deferred revenue adjustment reflects the fair value adjustment to deferred revenues acquired in business combinations. The fair value of deferred revenue represents an amount equivalent to the estimated cost plus an appropriate profit margin, to perform services related to the acquiree's software and product support, which assumes a legal obligation to do so, based on the deferred revenue balances as of the acquisition date. Allscripts adds back this deferred revenue for its non-GAAP financial measures because it believes the inclusion of this amount directly correlates to the underlying performance of Allscripts operations and facilitates comparisons of the separate 2010 pre-merger results of legacy Allscripts and Eclipsys to that of the Company's post-merger results.

Acquisition-Related Amortization. Acquisition-related amortization expense is a non-cash expense arising from the acquisition of intangible assets in connection with acquisitions or investments. Allscripts excludes acquisition-related amortization expense from non-GAAP operating income and non-GAAP net income because it believes (i) the amount of such expenses in any specific period may not directly correlate to the underlying performance of Allscripts business operations and (ii) such expenses can vary significantly between periods as a result of new acquisitions and full amortization of previously acquired intangible assets. Management believes that this adjustment facilitates comparisons of the 2010 pre-merger results of legacy Allscripts and Eclipsys to that of the Company's post-merger results. Investors should note that the use of these intangible assets contributed to revenue in the periods presented and will contribute to future revenue generation and the related amortization expense will recur in future periods.

Stock-Based Compensation Expense. Stock-based compensation expense is a non-cash expense arising from the grant of stock awards to employees. Allscripts excludes stock-based compensation expense from non-GAAP operating income and non-GAAP net income because it believes (i) the amount of such expenses in any specific period may not directly correlate to the underlying performance of Allscripts business operations and (ii) such expenses can vary significantly between periods as a result of the timing of grants of new stock-based awards, including grants in connection with acquisitions. Investors should note that stock-based compensation is a key incentive offered to employees whose efforts contributed to the operating results in the periods presented and are expected to contribute to operating results in future periods and such expense will recur in future periods.

Transaction-Related Expenses. Transaction-related expenses are fees and expenses, including legal, investment banking and accounting fees and other integration-related expenses, incurred in connection with announced transactions. Allscripts excludes transaction-related expenses from non-GAAP operating income and non-GAAP net income because it believes (i) the amount of such expenses in any specific period may not directly correlate to the underlying performance of Allscripts business operations and (ii) such expenses can vary significantly between periods.

ARS Sales. Realized loss in the second quarter of 2010 on the sale of one of Eclipsys' auction rate securities.

Tax Rate Alignment. Tax adjustment to align the current fiscal quarter's effective tax rate to the expected annual effective tax rate.

Management also believes that non-GAAP revenue, gross profit, operating income and net income and non-GAAP net income on a per share basis provide useful supplemental information to management and investors regarding the underlying performance of the Company's business operations and facilitates comparisons of the separate 2010 pre-merger results of legacy Allscripts and legacy Eclipsys to that of the Company's 2010 post-merger results. Acquisition accounting adjustments made in accordance with GAAP can make it difficult to make meaningful comparisons of the underlying operations of the business without considering the non-GAAP adjustments that we have provided and discussed herein. Management also uses this information internally for forecasting and budgeting as it believes that these measures are indicative of the Company's core operating results. In addition, the Company uses non-GAAP revenue, operating income and/or net income to measure achievement under the Company's stock and cash incentive compensation plans. Note, however, that non-GAAP revenue, gross profit, operating income and net income and non-GAAP net income on a per share basis are performance measures only, and they do not provide any measure of the Company's cash flow or liquidity. Non-GAAP financial measures are not in accordance with, or an alternative for, measures of financial performance prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with Allscripts results of operations as determined in accordance with GAAP. Investors and potential investors are encouraged to review the reconciliation of non-GAAP financial measures with GAAP financial measures contained within the attached condensed consolidated financial statements.
